

Objective Id	Objective Name and Short Description	Priority (L, H)	Reference in System Module / Scenario	Reference in the test cases TC#	Status (Done / Not Done)
Objective 1	To provide secure access to AMS for all approved user roles.	H	Authentication, panel access, role approval, and MFA modules	Verify login, panel access, approval control, and MFA.	Done
O1-T1	Design and implement separate login access for Admin, Staff, and Student users.	H	Filament Admin Panel /admin, Staff Panel /staff, Student Panel /student	TC-O1-01: Login as each approved role and confirm access to the correct panel only.	Done
O1-T2	Control access by role and approval status: Super Admin and Coordinator use Admin, Reviewer/Supervisor uses Staff, and Student uses Student.	H	User::canAccessPanel(), EnsurePanelAccess, Spatie roles	TC-O1-02: Try cross-panel access and unapproved coordinator access; confirm system blocks them.	Done
O1-T3	Add MFA/TOTP support and login rate limiting for secure authentication.	H	Filament MFA, Laravel Fortify, login and two-factor rate limiters	TC-O1-03: Enroll MFA, log in with second factor, and test repeated failed login attempts.	Done
Objective 2	To allow evaluators to enter, save, edit, and submit project assessment marks.	H	Evaluation form, dynamic rubric builder, and evaluation service	Verify evaluator access, score validation, draft saving, editing, and final submit lock.	Done
O2-T1	Generate the mark-entry form dynamically from the selected rubric template, including group criteria and individual student criteria.	H	Staff Evaluation Form and BuildsEvaluationForm	TC-O2-01: Open an assigned evaluation and confirm the correct rubric sections and student criteria appear.	Done
O2-T2	Validate scores as numeric values within each criterion maximum and save the marks in the database.	H	EvaluationService and evaluation_scores table	TC-O2-02: Enter valid and invalid scores and confirm validation and database saving.	Done
O2-T3	Allow evaluators to save marks as draft, edit them before submission, and lock the form as read-only after final submission.	H	saveDraft(), submitEvaluation(), submitted read-only state	TC-O2-03: Save draft, reload, edit marks, submit, then confirm fields are locked.	Done
Objective 3	To calculate and present final consolidated marks from submitted assessments.	H	Grade consolidation, components, grading scale, and notification modules	Verify calculation, component breakdown, grades, and notification flow.	Done
O3-T1	Automatically calculate each student final mark after all project evaluations are submitted.	H	GradeConsolidationService, consolidated_marks, consolidated_mark_components	TC-O3-01: Submit all project evaluations and confirm consolidated marks are created.	Done
O3-T2	Store a clear component breakdown showing where each part of the final mark came from.	H	Consolidated mark components and ConsolidatedMarkResource view	TC-O3-02: Open a consolidated mark and confirm the score breakdown is visible.	Done
O3-T3	Show calculated score, override score, final score, letter grade, and GPA information in the consolidation view.	H	ConsolidatedMarkResource and GradingScale model	TC-O3-03: Open Grade Consolidation and confirm final score and letter grade display correctly.	Done
O3-T4	Notify users when evaluation or final mark milestones are reached.	L	AllEvaluationsSubmittedNotification, MarksFinalisedNotification, EvaluationUnlockedNotification	TC-O3-04: Complete evaluations and unlock an evaluation; confirm the related notifications are triggered.	Done
Objective 4	To apply CIA security controls for the local AMS installation.	H	Local Laravel Herd HTTPS setup, MySQL server, RBAC, MFA, validation, and audit structure	Verify local HTTPS, secure access, data validation, and audit readiness.	Done
O4-T1	Run AMS locally using Laravel Herd with HTTPS option ON and a local MySQL server. External hosting is out of scope for this project.	H	Local Laravel Herd environment with MySQL database	TC-O4-01: Open the local AMS site through Herd HTTPS and confirm the application runs securely locally.	Done
O4-T2	Protect confidentiality using login, MFA, approved-account control, and role-based panel access.	H	Fortify, Filament MFA, User::canAccessPanel(), EnsurePanelAccess	TC-O4-02: Confirm every role can access only its allowed area after approval and MFA.	Done
O4-T3	Protect integrity using validation, database transactions, soft deletes, locked submitted forms, and required override reasons.	H	EvaluationService, GradeConsolidationService, policies, soft deletes, override action	TC-O4-03: Test invalid input, submitted-form lock, override reason, and preserved records after delete.	Done
O4-T4	Complete action-level audit logging for critical actions such as proxy marking, unlocks, overrides, and report exports.	H	Activity log table and Recent Activity widget exist; full write events still need implementation	TC-O4-04: Pending: perform each critical action and confirm an audit entry is written with user, time, and action details.	Not Done
Objective 5	To generate final academic grade reports and exports for local academic records.	H	Grade Export page, CSV export, PDF report, and coordinator-scoped grade access	Verify preview, CSV export, PDF export, and access restriction.	Done
O5-T1	Preview final consolidated grade records by semester and course before export.	H	GradeExport preview table	TC-O5-01: Select semester/course and confirm the preview shows correct grade records.	Done
O5-T2	Export final grade records as CSV and PDF, including calculated score, override score, final score, and letter grade.	H	GradeExport CSV and PDF actions; grade-report PDF view	TC-O5-02: Export CSV and PDF and compare values with Grade Consolidation.	Done
O5-T3	Restrict report/export data so Coordinators only see semesters assigned to them, while Super Admin can oversee all.	H	Coordinator-scoped queries in GradeExport	TC-O5-03: Login as Coordinator and confirm only assigned semester data is visible.	Done
Objective 6	To enable Coordinators to manage the full assessment lifecycle with oversight and control authority.	H	Semester setup, project management, proxy marking, monitoring, consolidation, override, and semester closure modules	Verify lifecycle setup, assignments, proxy entry, monitoring, override, and closure.	Done
O6-T1	Create or select semesters and create projects manually or through the project import workflow.	H	SemesterResource, ProjectResource, SemesterSetupWizard, ProjectsBulkImporter	TC-O6-01: Create/select a semester, then create or import projects for it.	Done
O6-T2	Assign students, supervisors, and reviewers to projects, including safe student move warnings when a student is already assigned in the same semester.	H	Project relation managers and StudentProjectReassignment helper	TC-O6-02: Assign supervisor, reviewers, and students; test the student reassignment warning.	Done
O6-T3	Enable proxy mark entry so a Coordinator can submit an assessment on behalf of an unavailable evaluator, while storing proxy attribution.	H	ProxyEvaluationForm and on_behalf_of_user_id	TC-O6-03: Submit a proxy assessment and confirm the proxy user is stored on the evaluation.	Done
O6-T4	Monitor assessment status, unlock submitted evaluations for correction, and clear stale consolidated marks before recalculation.	H	EvaluationResource monitoring and unlock action	TC-O6-04: Unlock a submitted evaluation and confirm it returns to draft and stale consolidated marks are cleared.	Done
O6-T5	Review consolidated grades, apply an override with a reason, and close a semester when the assessment work is finished.	H	ConsolidatedMarkResource override action and SemesterResource close action	TC-O6-05: Override a final mark with reason, then close the semester after review.	Done
